

Complete your self-care journey with annual screenings

The Nura Experience

At NURA, screening is designed to be comfortable. Our experience is based on decades of screening practice from Japan, its cutting-edge technology, and the warmth of their hospitality.

We have tailored the screening experience to fit easily into your busy schedule.

Book Package Online

Pick a slot that works for you and book your appointment at NURA.

Receive Nura Home Kit

A personalised Home Kit will be given to you, complete with FIT kit and pre-screening instructions.

Screening at Nura

At Nura, our specialised staff will be available at all times for assistance.

Report & Consult

Our specialist GP will take you through your personalised health report.

Using intelligent AI technology to improve your experience

Our screening devices from Fujifilm are designed for your comfort and safety. They are minimally invasive and ergonomically designed ensuring that your experience is as comfortable as possible.

Advanced imaging technology lets us do more with less

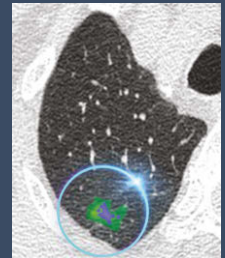

Our technology provides quick and accurate results, while always keeping your safety in mind. Our AI-assisted devices from Fujifilm allow us to deliver intelligent scanning and predictions even at ultra-low doses of radiation.

Ultra Low-Dose Scan

A regular scan at ultra-low dose radiation is noisy and unclear, making it possible to overlook a problem.

AI Enhanced Ultra Low-Dose Scan

Our AI technology refines the quality of the ultra-low dose scan to assist the doctor in early detection.

A unique experience designed to put you and your safety first

We ensure you complete your screening and walk out with your report in 120* minutes.

CANCER SCREENING

Lung, Breast (Mammogram),

Cervical, Colon, Oral

Importance of screening and early detection

NURA
Sustained Health with Active-AI Screening

Screening helps you identify previously unrecognised health risks. Finding them at an early stage allows you to modify your lifestyle and prevent diseases.

Japan is a great example of why early detection works. Life expectancy in Japan is the longest in the world, thanks in part to their tradition of annual screening.

Nura is modelled after this Japanese system of annual screening.

FOR CORPORATES

Nura helps your employees perform to their potential

Our specialised corporate screening packages are mutually beneficial for both employees and employer. Contact us for more information.
